

April 24, 2020

Dear Residents, Families, Friends and other stakeholders,

We are committed to doing everything that we can to keep our residents safe and to continue to keep the lines of communication open.

WSC to date we have 8 resident and multiple staff test positive for COVID-19. 2 residents are hospitalized, 4 residents are being cared for at home with mild symptoms and 2 are home, recovered and cleared for full activity. Homes currently dealing with active positive diagnosis are Shea Complex, Walnut Rd, Jackson Rd, 116 Broadway and 464 Broadway.

As more residents receive diagnosis's, staff start to return from quarantines and residents are discharged from the hospital we have seen an increase in questions around how long to implement isolation protocols for residents and when can staff work or return to work. Attached as an addendum are WSC protocols that are based on the DDS and CDC guidelines.

We are not surprised by this increase in cases. According to the predictions we are in the peak surge of the virus but do not know when we will start to see a decrease. Let's try to stick together and support one another!

We are taking advantage of the mobile testing offered by DDS and are currently waiting for tests results for several residents at Walnut Rd and Shea Rd. Additionally, we have requested testing at Jackson Rd and 464 Broadway. In some cases, the PCP has arranged testing or order monitoring in place of testing.

WSC continues to work to obtaining Personal Protective Equipment (PPE). Fortunately, currently we have been able to secure the PPE that we need to protect staff. We have ample gloves, surgical masks, KN95 masks and gowns

As of pay period starting 4/5 WSC is offering premium pay during the COVID pandemic crisis. Until further notice all direct care staff will be getting \$2 an hour more. Additionally, if you are working in a COVID positive home you will be getting \$5 an hour more as opposed to \$2. We are implementing this to help reward our dedicated staff!

Many of our residents are elderly and may have medical conditions putting them at a higher risk of becoming sick. Healthcare personnel (HCP) are the most likely sources of introduction of the virus that causes COVID-19 into our homes. To protect our vulnerable residents, we are continuing to follow actions to reduce the risk of COVID-19 in our residents and staff:

- Effective April 9, 2020 WSC will only use relief agency staff if all other staffing options have been exhausted.
- Effective 3/31 all staff are being asked to wear masks both at the work location and in public spaces when conducting company business.

- Effective April 1, 2020 all persons in the building need to be wearing a mask at all times.
- Effective March 17, 2020 we closed our Day Programs. Those programs will remain closed until further notice. We expect them to be closed at least until the state of emergency/stay at home order is lifted.
- Effective March 17, 2020 we have limited access to 291 Mystic Ave to workers that are considered essential to our operations. All non-essential activities have been postponed.
- Effective March 17, 2020 all visitation is being restricted except for certain compassionate care situations, such as VNA or end of life situations.
 - We know that your presence is important for your loved one but, per guidance from the Centers for Disease Control and Prevention (CDC), this is a necessary action to protect their health. We are recommending alternative methods of visitation (such as Skype and FaceTime) so that you can continue to communicate with your loved ones.
 - Visitors who are permitted to enter homes will be required to frequently clean their hands, limit their visit to a designated area within the building, and wear a facemask. As the situation with COVID-19 is rapidly changing, we will continue to keep you updated.
- We are monitoring healthcare personnel and residents for symptoms of respiratory illness. Healthcare personnel will be actively monitored for fever and symptoms of respiratory infection. Ill healthcare personnel will be asked to stay home. You may see healthcare personnel wearing facemasks and gloves in order to prevent germs from spreading and help keep residents safe. Healthcare personnel will clean their hands frequently. We are assessing residents daily for fevers and symptoms of respiratory infection in order to quickly identify ill residents and implement additional infection prevention activities.
- When ill residents are identified, they will be monitored closely, asked to stay in their rooms and/or wear a mask. Also, their PCP will be contacted ASAP.
- We are limiting activities within residences. We are cancelling all group activities and all community outings. We will be helping residents to practice social distancing, including during meals, and to frequently clean their hands. We encourage you to review the CDC website for information about COVID-19, including its symptoms, how it spreads, and actions you can take to protect your health: <https://www.cdc.gov/coronavirus/2019-ncov/>

Thank you very much for everything you are doing to keep our residents and facility staff safe and healthy. We will continue to monitor the situation in our community and keep you informed.

Carolyne Guffey, M.B.A., PHR
